5 EASY STEPS FOR THE FASTEST BLOW-DRY WITH EXTENSIONS

LIST OF ITEMS YOU'LL NEED:
DAVINES OI OIL, DETANGLE BRUSH, VENTED BRUSH, LARGE ROUND BRUSH, GATOR CLIPS

1 Clip each section up with a Gator Clip, except your bottom row.
With your hair free from tangles start with the top section of your hair. Run your fingers along your top row, gather your hair while brushing up, and twist and pin. Repeat this step for each of your rows, leaving your bottom row down.

2 Use Oi oil. Pump a couple of pumps of Oi oil into the palms of your hands, rub them together and distribute evenly throughout your row. Use your detangler brush to brush in the oil.

3 Dry your row's base. Use your fingers with a claw-like grip to grab your row near the base, pull it gently out, and blow dry. Focus on where the stitching is. Make sure the entire row's base is dry before moving on. Always make sure your blow dryer is pointing down in the direction of the hair. This will allow for a smooth finish of the hair strands.

4 Dry your mids and ends. Use your Vented brush under your row and blowdry in a slow motion brushing down. Start on one side and move along in sections until you get to the other side. Repeat until your hair is about 90% dry.

5 Smooth out and finish. Use your Large Round brush under your row in a slow motion brushing down while turning the brush in a circular motion. This will give your hair and extensions a smooth, silky finish. It sets your hair up for the best curls or leaves you with a straight, smooth look. Both are beautiful!

Repeat this process for each row you're wearing as well as your top section, which you can section off in two if you'd like.
